

MARINE · OFFSHORE · ENERGY

Engineering confidence. Worldwide.

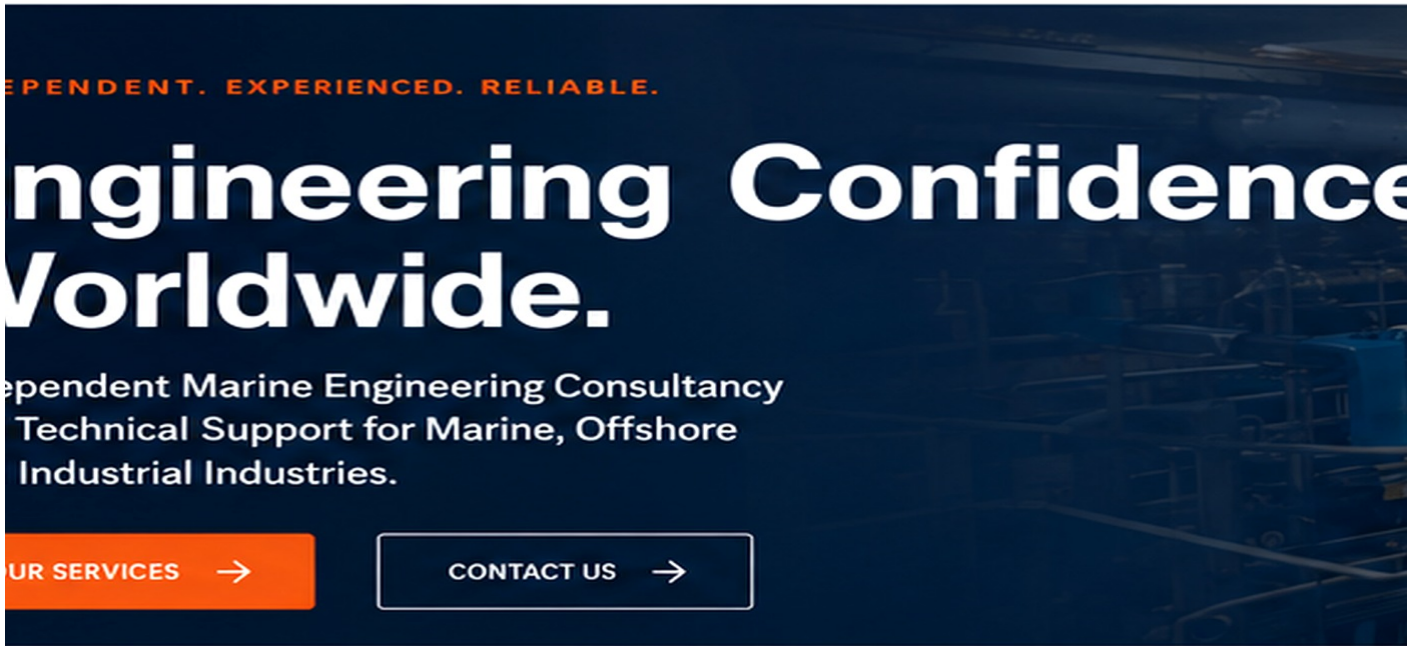

Independent marine engineering consultancy, project delivery and technically verified sourcing for shipowners, shipyards and offshore operators.

COMPANY PROFILE

Independent judgement. Practical delivery.

Land & Sea Consulting supports technical departments throughout the lifecycle of marine and offshore assets. We help clients turn incomplete information, urgent failures and complex interfaces into controlled work scopes, defensible decisions and measurable outcomes.

Our services combine field engineering, technical supervision, project controls and technically verified sourcing. The operating model is intentionally agile: clear responsibilities, structured reporting and solutions aligned with the client's technical and commercial interests.

DEPENDENT. EXPERIENCED. RELIABLE.

Engineering Confidence Worldwide.

Independent Marine Engineering Consultancy
Technical Support for Marine, Offshore
Industrial Industries.
